

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method for forming a wireless network comprising ~~the following steps:~~

(a) broadcasting a network invitation signal to potential member of the wireless network that are within a range of the wireless network; ~~and,~~

(b) upon a potential member of the wireless network responding affirmatively to join the wireless network, performing the following ~~substeps:~~

(b.1) obtaining identification information from the potential member, and

(b.2) including the potential member within the wireless network; ~~and,~~

~~(c) upon the potential member selecting to log out of the wireless network, excluding the potential member from the wireless network.~~

2. (Currently Amended) A method as in claim 1 additionally comprising the following ~~step:~~

(~~ed~~) upon a second potential member of the wireless network responding negatively to join the wireless network, excluding the second potential member from the wireless network.

3. (Currently Amended) A method as in claim 1 wherein ~~in step (a)~~ potential members of the wireless network include users with one of the following devices:

- a personal digital assistant;
- a notebook computer;
- a cellular phone;
- a pager.

4. (Canceled)

5. (Currently Amended) A method for forming a wireless network comprising the following:

(a) broadcasting a network invitation signal to potential member of the wireless network that are within a range of the wireless network;

(b) upon a potential member of the wireless network responding affirmatively to join the wireless network, performing the following:

(b.1) obtaining identification information from the potential member, and

(b.2) including the potential member within the wireless network;  
and, as in claim 1 additionally comprising the following step:

(c) upon the wireless network losing contact with the potential member, excluding the potential member from the wireless network.

6. (Currently Amended) A method as in claim 1 wherein ~~in step (a)~~ the range of the wireless network includes one of the following:

- a store site;
- a sports stadium;
- a sports pavilion;
- a museum;
- a tourist site;
- a university;
- a school;
- an apartment complex;
- a home;
- a manufacturing location;
- a research site.

7. (Currently Amended) A method by which a potential member interacts with a wireless network, the method comprising the following ~~step~~:

(a) upon the potential member receiving a broadcast network invitation signal to join the wireless network, performing the following ~~substeps~~ by the potential member:

(a.1) when the potential member wishes to join the wireless network, performing the following ~~substeps~~:

responding affirmatively to the broadcast network invitation signal to join the wireless network, and

providing identification information to the wireless network in response to a request for the identification information, and

(a.2) when the potential member does not wish to join the wireless network, performing the following ~~substep~~:

responding negatively to the broadcast network invitation signal to join the wireless network; and,

(b) upon the potential member selecting to log out of the wireless network, exiting the potential member from the wireless network.

8. (Original) A method as in claim 7 wherein the potential member is a user with one of the following devices:

a personal digital assistant;

a notebook computer;

a cellular phone;

a pager.

9. (Canceled).

10. (Currently Amended) A method by which a potential member interacts with a wireless network, the method comprising the following:

(a) upon the potential member receiving a broadcast network invitation signal to join the wireless network, performing the following by the potential member:

(a.1) when the potential member wishes to join the wireless network, performing the following:

responding affirmatively to the broadcast network invitation signal to join the wireless network, and

providing identification information to the wireless network in response to a request for the identification information, and

(a.2) when the potential member does not wish to join the wireless network, performing the following:

responding negatively to the broadcast network invitation signal to join the wireless network; and, as in claim 7 additionally comprising the following step:

(b) upon the potential member losing contact with the wireless network ,  
excluding the potential member from the wireless network.

11. (Original) A method as in claim 7 wherein a range of the wireless network includes one of the following:

a store site;

a sports stadium;  
a sports pavilion;  
a museum;  
a tourist site;  
a university;  
a school;  
an apartment complex;  
a home;  
a manufacturing location;  
a research site.

12. (Currently Amended) Storage media which when executed on a computing device performs a method by which a potential member interacts with a wireless network, the method comprising the following step:

(a) upon the potential member receiving a broadcast network invitation signal to join the wireless network, performing the following substeps by the potential member:

(a.1) when the potential member wishes to join the wireless network, performing the following substeps:

responding affirmatively to the broadcast network invitation signal to join the wireless network, and

providing identification information to the wireless network in response to a request for the identification information; and,

(a.2) when the potential member does not wish to join the wireless network, performing the following ~~substep~~:

responding negatively to the broadcast network invitation signal to join the wireless network; and,

(b) upon the potential member selecting to log out of the wireless network, exiting the potential member from the wireless network.

13. (Original) Storage media as in claim 12 wherein the computing device is one of the following:

a personal digital assistant;

a notebook computer;

a cellular phone;

a pager.

14. (Canceled)

15. (Currently Amended) Storage media which when executed on a computing device performs a method by which a potential member interacts with a wireless network, the method comprising the following:

(a) upon the potential member receiving a broadcast network invitation signal to join the wireless network, performing the following by the potential member:

(a.1) when the potential member wishes to join the wireless network, performing the following:

responding affirmatively to the broadcast network invitation signal to join the wireless network, and

providing identification information to the wireless network in response to a request for the identification information; and

(a.2) when the potential member does not wish to join the wireless network, performing the following:

responding negatively to the broadcast network invitation signal to join the wireless network; and, as in claim 12 wherein the method additionally comprises the following step:

(b) upon the potential member losing contact with the wireless network , regarding the potential member as having exited from the wireless network.

16. (Original) Storage media as in claim 12 wherein a range of the wireless network includes one of the following:

a store site;

a sports stadium;

a sports pavilion;

a museum;  
a tourist site;  
a university;  
a school;  
an apartment complex;  
a home;  
a manufacturing location;  
a research site.

17. (New) A method as in claim 5 additionally comprising the following:

(d) upon a second potential member of the wireless network responding negatively to join the wireless network, excluding the second potential member from the wireless network.

18. (New) A method as in 5 wherein in (a) potential members of the wireless network include users with one of the following devices:

a personal digital assistant;  
a notebook computer;  
a cellular phone;  
a pager.

19. (New) A method as in claim 5 wherein in (a) the range of the wireless network includes one of the following:

- a store site;
- a sports stadium;
- a sports pavilion;
- a museum;
- a tourist site;
- a university;
- a school;
- an apartment complex;
- a home;
- a manufacturing location;
- a research site.

20. (New) A method as in claim 10 wherein the potential member is a user with one of the following devices:

- a personal digital assistant;
- a notebook computer;
- a cellular phone;
- a pager.

21. (New) A method as in claim 10 wherein a range of the wireless network includes one of the following:

- a store site;
- a sports stadium;
- a sports pavilion;
- a museum;
- a tourist site;
- a university;
- a school;
- an apartment complex;
- a home;
- a manufacturing location;
- a research site.

22. (New) Storage media as in claim 15 wherein the computing device is one of the following:

- a personal digital assistant;
- a notebook computer;
- a cellular phone;
- a pager.

23. (New) Storage media as in claim 15 wherein a range of the wireless network includes one of the following:

- a store site;
- a sports stadium;
- a sports pavilion;
- a museum;
- a tourist site;
- a university;
- a school;
- an apartment complex;
- a home;
- a manufacturing location;
- a research site.
